

LES ART WEEK

Featuring solo exhibitions by

Cal Lane, Sherry Parker, Brooks Salzwedel

October 17th- November 25th, 2018

Opening Reception: October 17th 6-8pm

Foley Gallery is pleased to participate in the first annual Lower East Side Art Week. We will be featuring solo exhibitions by Canadian sculptor **Cal Lane**, Santa Rosa based collage artist **Sherry Parker** and Los Angeles based artist **Brooks Salzwedel**.

Cal Lane creates larger than life metal stand-alone sculptures that capture a delicacy and curious approach to gender roles and conceptual art.

Lane's tapestries, cut into harsh and often preternaturally large steel and iron structures, are sensual, alluring and deeply effeminate.

Collage is an adventurous rush for **Sherry Parker**. Chance is her muse. Parker describes chance as *"a pervasive force in the sequence of my life as an artist..."*

The medium of collage excites Parker because of the ideas that flow from chance: the serendipitous discovery of "found" materials, the random selection process, the fortuitous mistakes, the bringing together of disparate pieces to begin the formation of order out of chaos. Through collage, Sherry address the puzzle of life.

foleygallery

Brooks Salzwedel's work focuses on natural and unnatural landscapes disconnected from their usual surroundings or places in time. Using a self-created process involving materials such as graphite, mylar and resin, tape, colored pencil, and ink, his work evokes feelings of desolation through haunted, dreamlike visions of otherworldly terrains.

Ancient trees, decaying flora, and icy mountains obscure long forgotten places and objects, at once familiar and unrecognizable, creating a space for rumination that challenges the relationship to their meaning.

The exhibitions *Panties, Dawn and Dusk and Secret Universe* are on view through November 25th, 2018. Foley Gallery is open Wednesday through Saturday, 11 – 5:30pm and Sunday from 12–5pm. To request images; please contact the gallery at info@foleygallery.com.
